

# Introduction to Construction

## Aims

Prepare learners for employment in construction by teaching knowledge and industry expected behaviours.

Successful learners complete the CITB operatives test to gain a funded CSCS labourers' card enabling immediate start on site.

Work with employers and stakeholders to deliver employment outcomes.

## Modules

**Health & Safety in Construction** – Risk assessments/manual handling/working at height/risks to health/causes of accidents/legislation/fire safety

**Working in the construction industry** – researching different careers in construction and making suitable career choices

**Working in a group** to complete construction-based tasks – group activities include Gantt chart planning, green living activity - impacts on housing developments on the environment/community and a home building costings activity.

**Working towards goals** – assessing own skills for working in construction and identifying actions for areas of improvement

**Preparing for interviews** in construction industry – employability skills/professional conduct/workplace expectations, E&D and specific construction preparation based on what job roles the candidate wants to get into
